## Instruction of electrical connection and mounting of Ledreflection mirrors

### Mirrors hanging

#### 1. Break in part hanging element

<p><b>2</b> 1. Mark the preferable hanging place on the wall, draw the straight line using a level, mark a center of the line</p> 	<p><b>3</b> Measure the hanging profile on a back side of a mirror.</p>  <p>Measure the distance (x)</p>
<p><b>4</b></p>  <p>Mark profile's measurements on the wall where center is marked (distance x)</p>	<p><b>5</b></p>  <p>Drill holes, tighten a plate while keeping a distance from the marked edge in a manner that allows to move and align the mirror.</p>

Connection is shown-in the picture below:

<p><b>A</b></p>  <p>A) Click the unused clipper;</p>	<p><b>B</b></p>  <p>B) Insert cable in to the prepared clipper and tighten it;</p>	<p><b>C</b></p>  <p>C) Check if cables are tightened properly</p>
